

## **INSERT A WINDOWS MEDIA VIDEO**

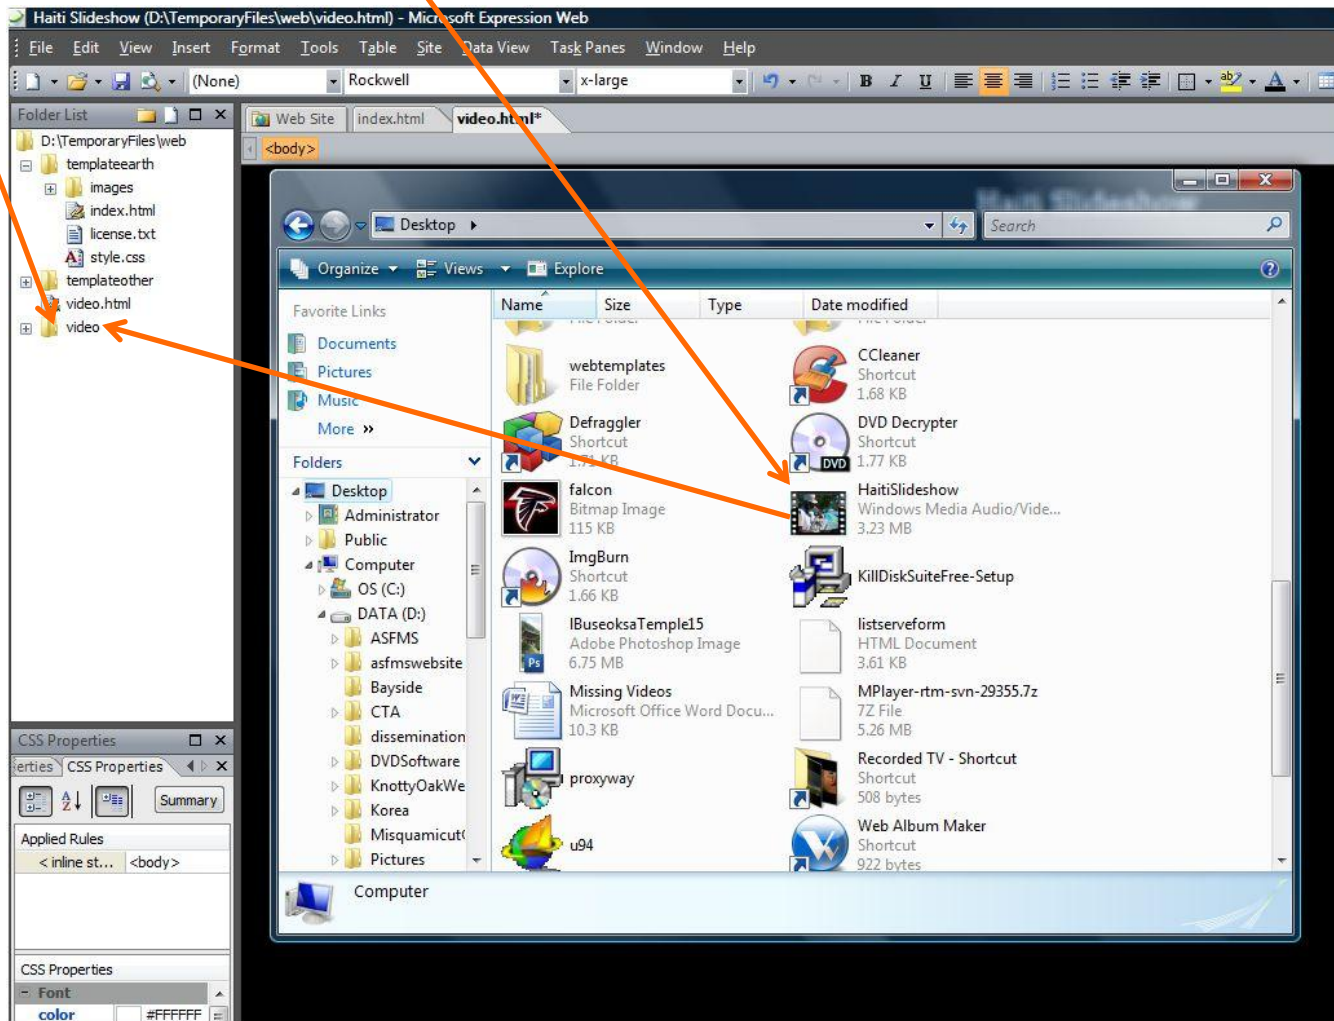

**Expression Web is limited in that it doesn't have the Silverlight encoder software to make a streaming "flash-like" video. But, it does work.**

HAVE YOUR WEBSITE OPEN AND A PAGE CREATED FOR IT. PLACE THE CURSOR IN THE PAGE WHERE YOU WANT THE VIDEO TO BE.

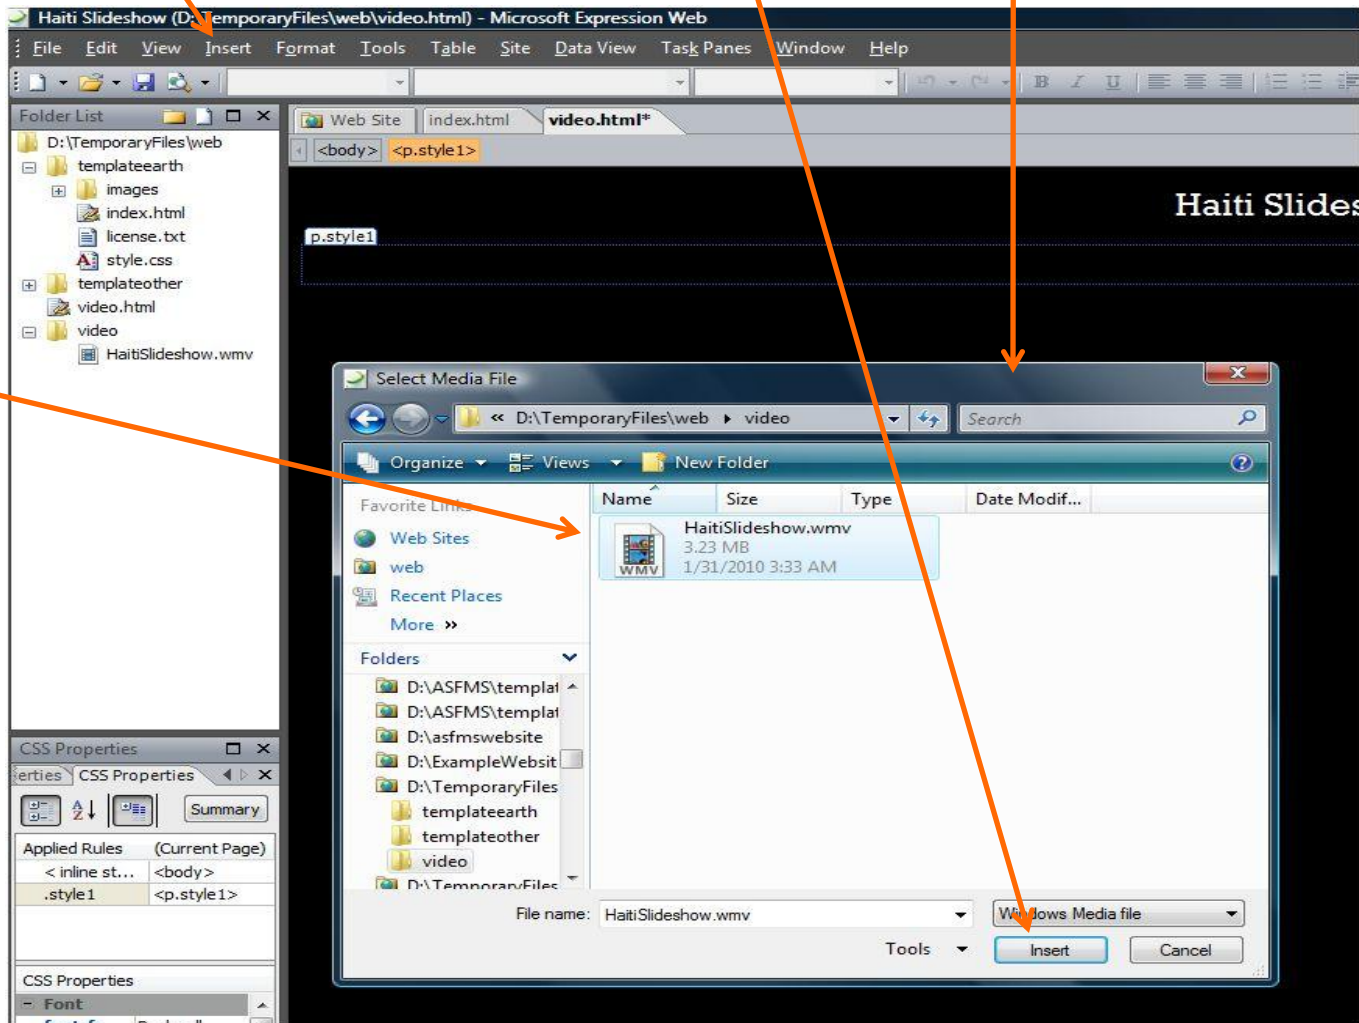

IMPORT YOUR VIDEO INTO YOUR WEBSITE. USE “MY COMPUTER” TO LOCATE IT, THEN DRAG IT INTO THE FOLDER ON YOUR SITE WHERE YOU WANT IT STORED.

It's always a good idea to create folders to store certain types of files and keep your site organized as it grows. I've created a “video” folder.

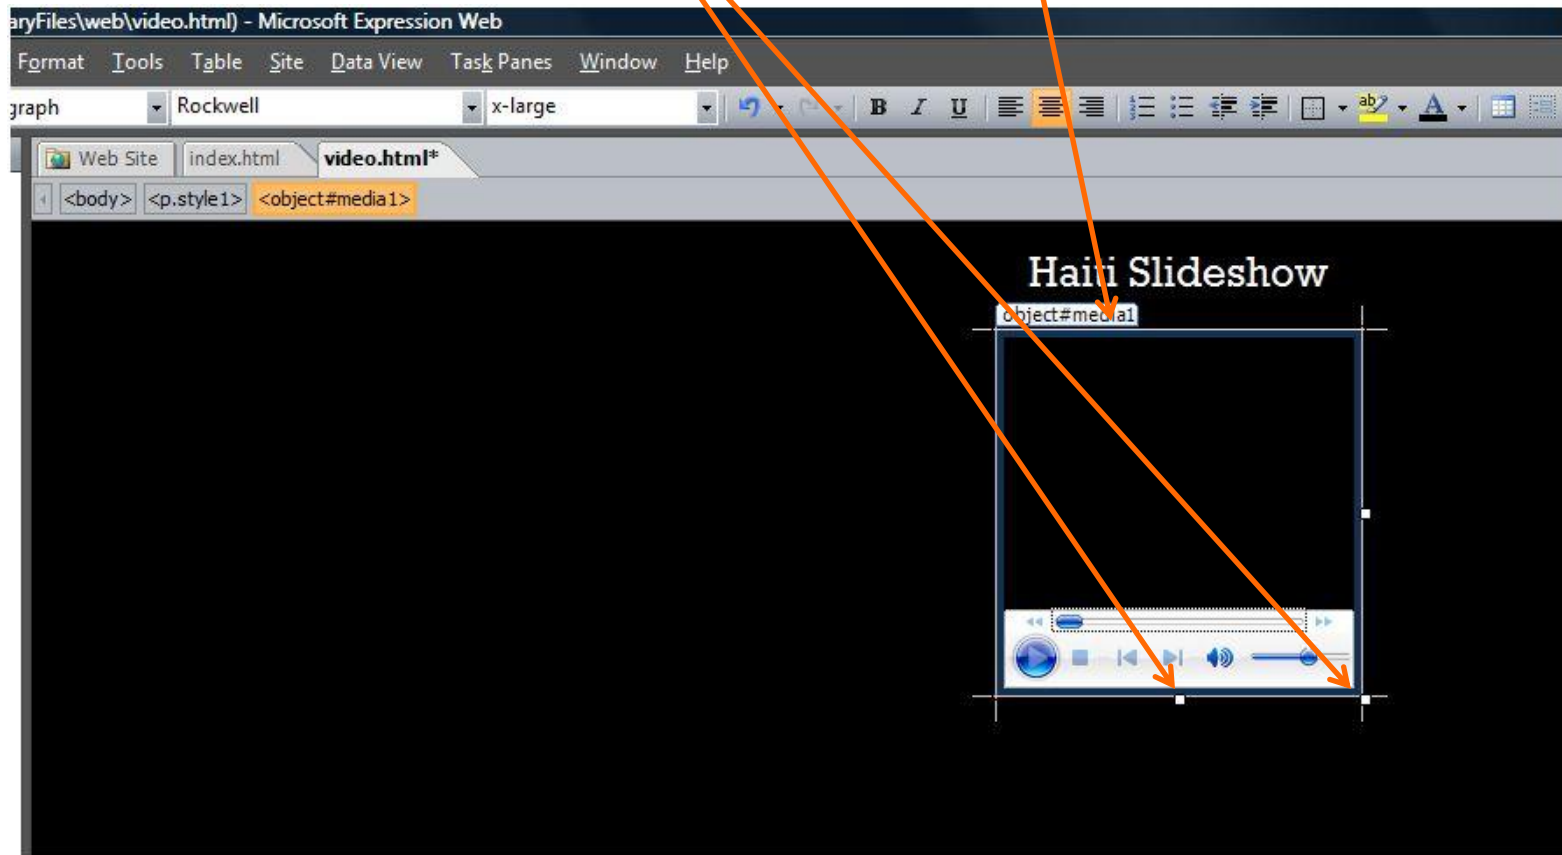

SELECT “INSERT” (DROP-DOWN MENU APPEARS) THEN “MEDIA” THEN “WINDOWS MEDIA PLAYER.” THIS WINDOW APPEARS. FIND YOUR VIDEO IN YOUR SITE AND CLICK “INSERT.”

My video file  
“HaitiSlideshow”  
is a Windows  
Media Video  
(.wmv)

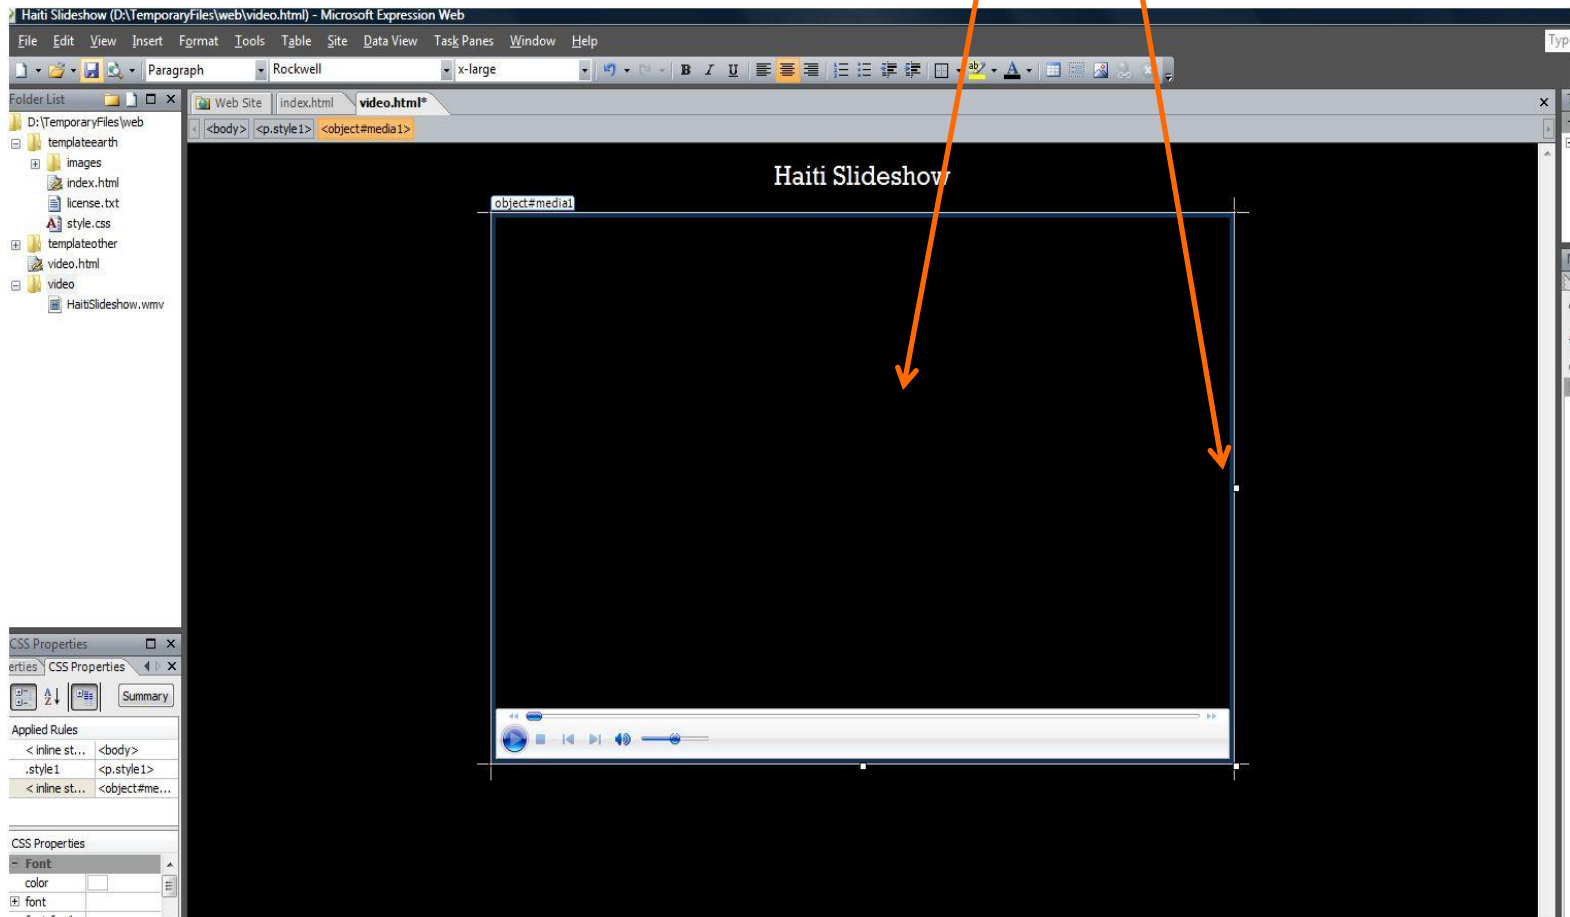

THE WINDOWS MEDIA PLAYER APPEARS IN YOUR WEBPAGE. YOU CAN CHANGE THE DIMENSIONS OF THE WINDOW BY DRAGGING A CORNER OR SIDE.

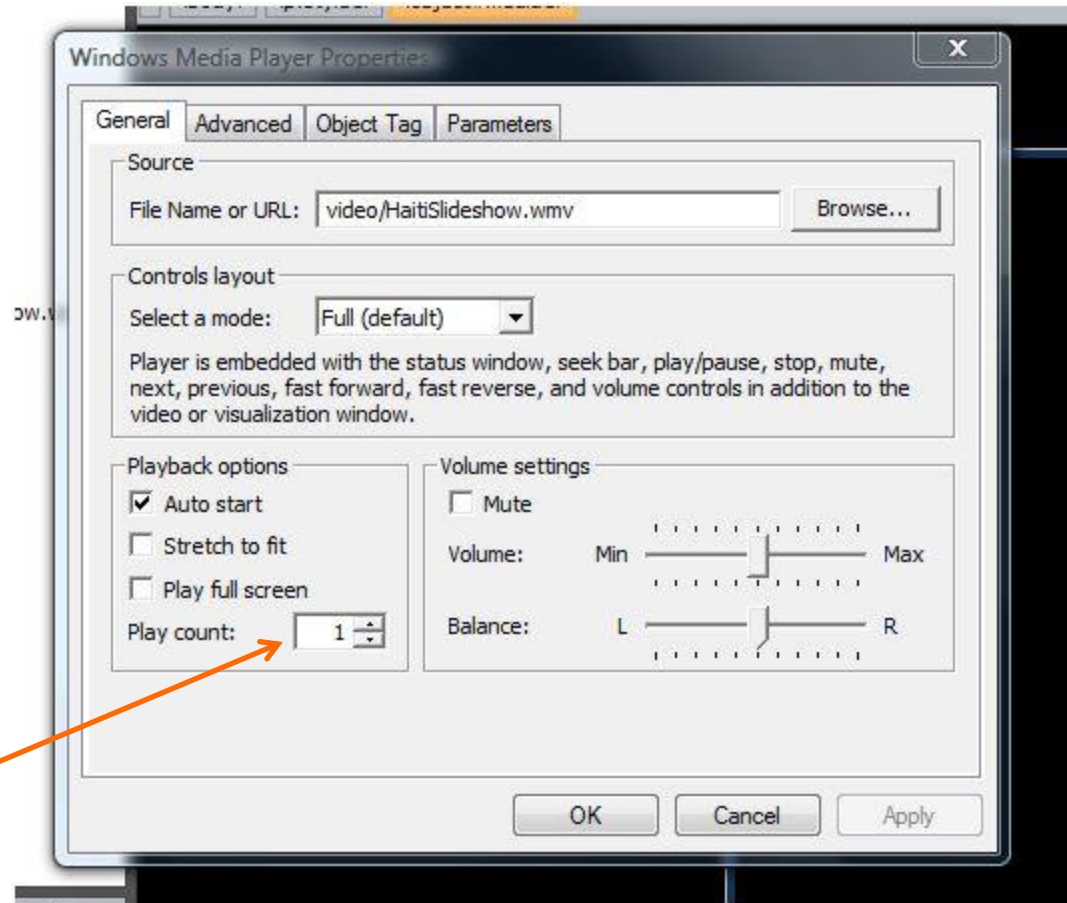

YOU CAN SEE HERE THAT I DRAGGED THE SIDES TO MAKE THE WINDOW LARGER. NOW, RIGHT-CLICK INSIDE OR ON THE WINDOW TO CHANGE THE PROPERTIES.

THIS WINDOW ALLOWS YOU TO CHANGE THE PROPERTIES OF THE VIDEO PLAYER. UNFORTUNATELY, IN MY EXPERIENCE, NOT MUCH WORKS IN MOST BROWSERS ANYWAY. IT WILL PLAY, BUT IT USUALLY LOOKS THE SAME.

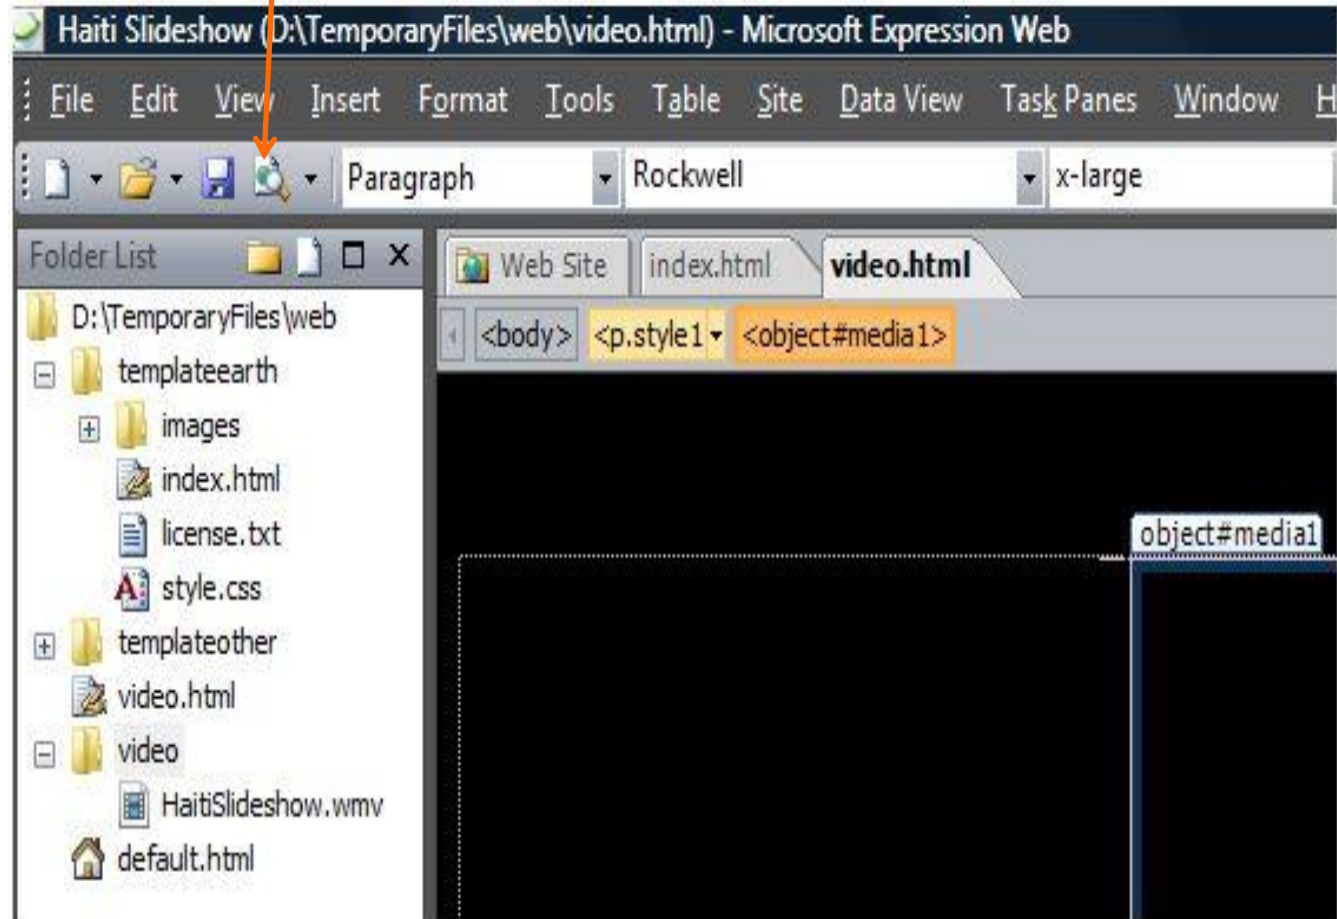

You should be able to play full screen automatically – Let me know if you get this to work. Also, player controls are always there, but never invisible as it's supposed to allow.

If you want it to play again and again, choose a high Play count.”

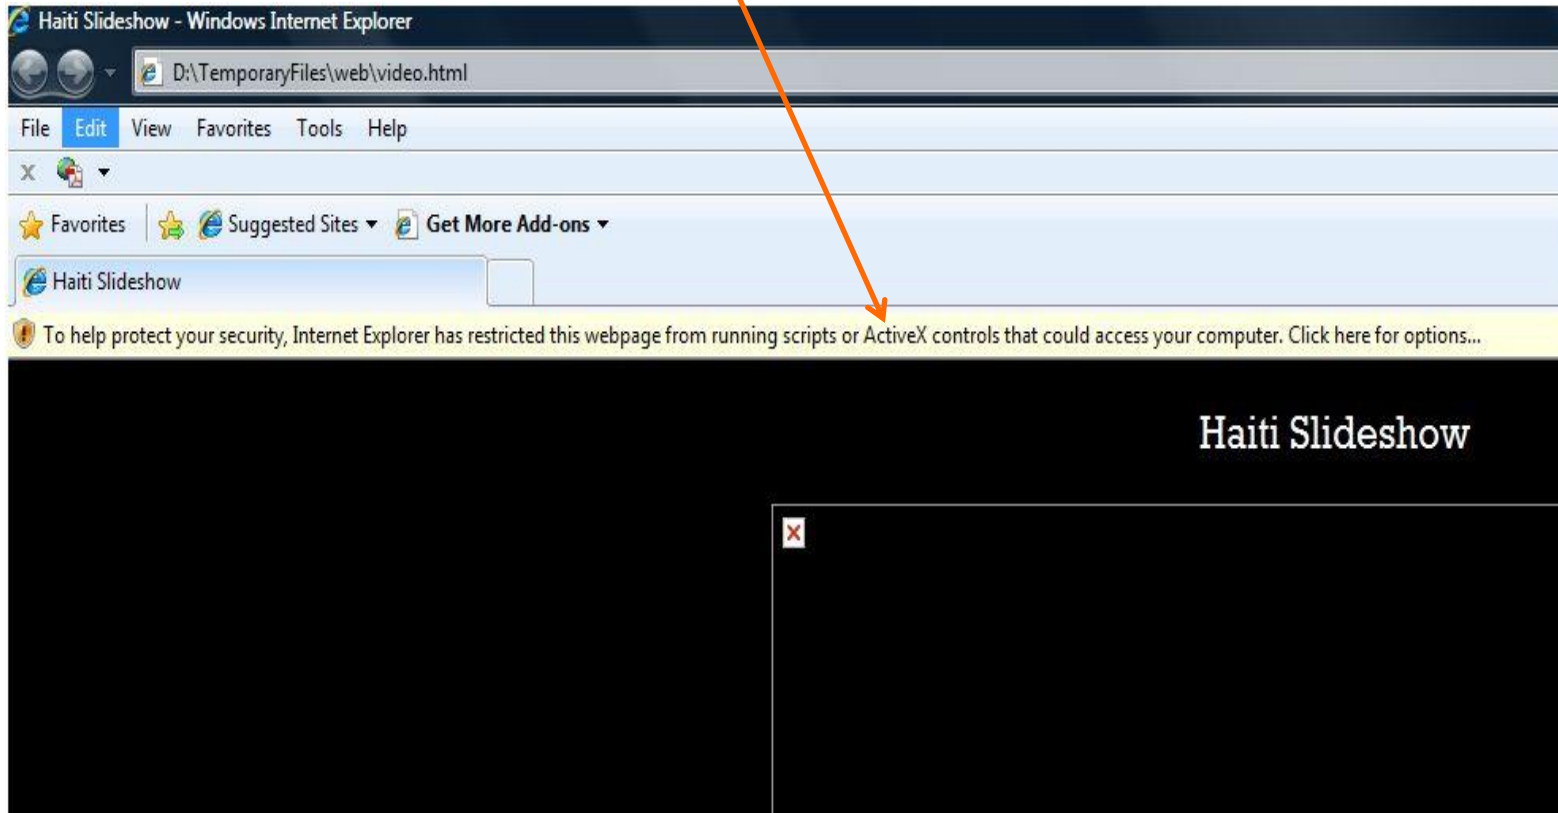

CLICK THE PREVIEW BUTTON TO SEE HOW IT LOOKS IN YOUR BROWSER.

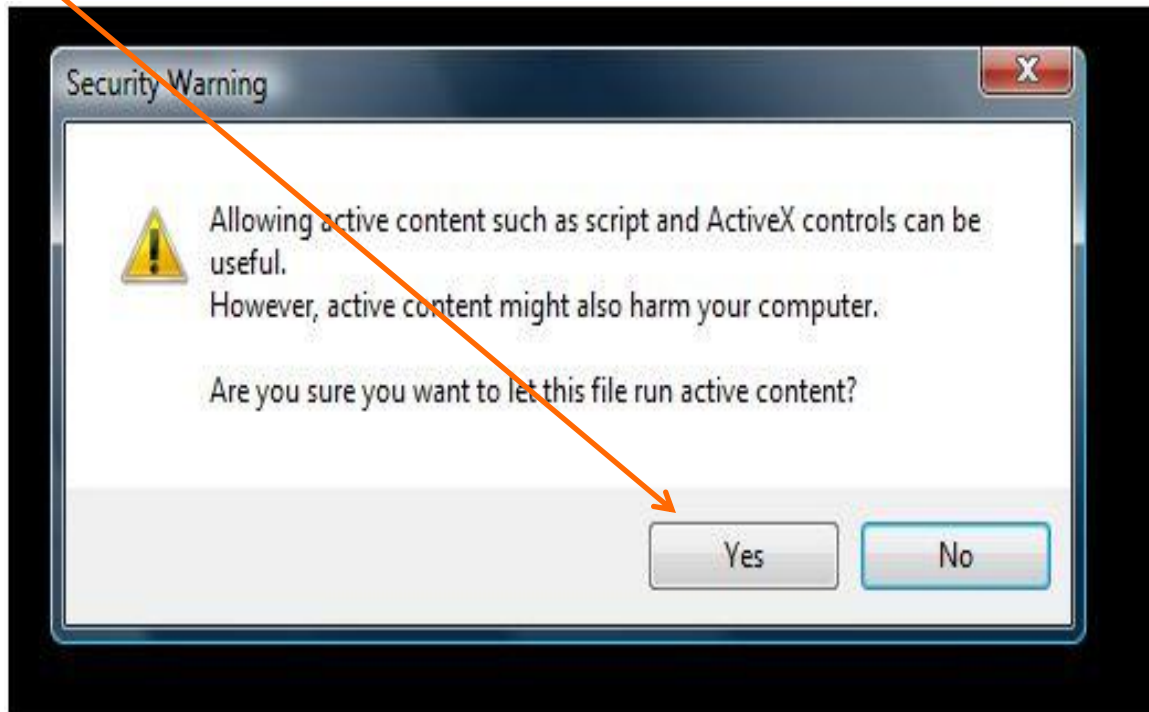

You will be prompted to save the webpage if you haven't already.

IF THE VIDEO AND YOUR SITE IS ONLY ON YOUR COMPUTER AND NOT ONLINE YET, THIS “ACTIVE X” YELLOW BAR POPS-UP. CLICK ON IT AND ALLOW.

THIS SECURITY WARNING POPS-UP. JUST PRESS  
“YES” AND YOUR COMPUTER WILL BE FINE.

## OTHER OPTIONS:

- Moyea Flash Video Pro allows you to create a streaming flash video with an .swf file that is compatible with Expression Web 2. It provides many options and compresses the file so it can stream easier. [http://www.video-to-flash.com/video\\_to\\_flash/](http://www.video-to-flash.com/video_to_flash/)

HERE'S AN EXAMPLE. YOU HAVE THE OPTION OF NO TOOLBAR IF YOU WANT IT.

ASFMS Orientation Video 2009

Spanish

00:00/30:00

[\[click here if video is freezing frequently - be patient\]](#)

**ASFMS Orientation Video 2009**

# THE SMALL SLIDESHOW BELOW IS WITHOUT CONTROLS OR PLAY BUTTON.

*Developing reliable, responsible, and  
s, one student at a time*  
810) 822-9426 School Hours: 7:55 A.M. - 2:25 P.M.

**MS**  
Principal, & Asst. Principal Gomes.

**Organizational Structure**

Unfortunately, coventringschools.net server doesn't have the software to do this. We are waiting for the upgrade. The proposal has been submitted.

## **THE END**

**I'll post a tutorial on how to use the Moyea software when our district server is upgraded and allows it. For now, persuade our superintendent to allocate the funds for this.**
