

# **WEB DESIGN**

**With Expression Web 2: Introduction - Opening  
your own new site.**

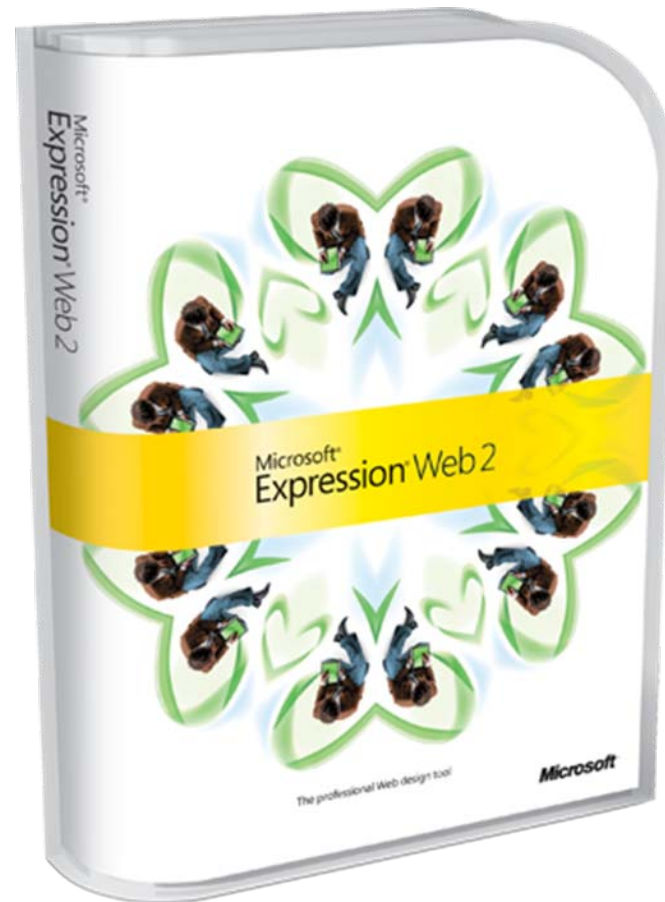

HOW THE INTERNET WORKS: YOUR COMPUTER FINDS CONTENT ON OTHER COMPUTERS AND DOWNLOADS IT. YOU HAVE TO SAVE/PUBLISH ANY WEB CONTENT YOU WANT OTHERS TO SEE ON THE SCHOOL SERVER/COMPUTER.

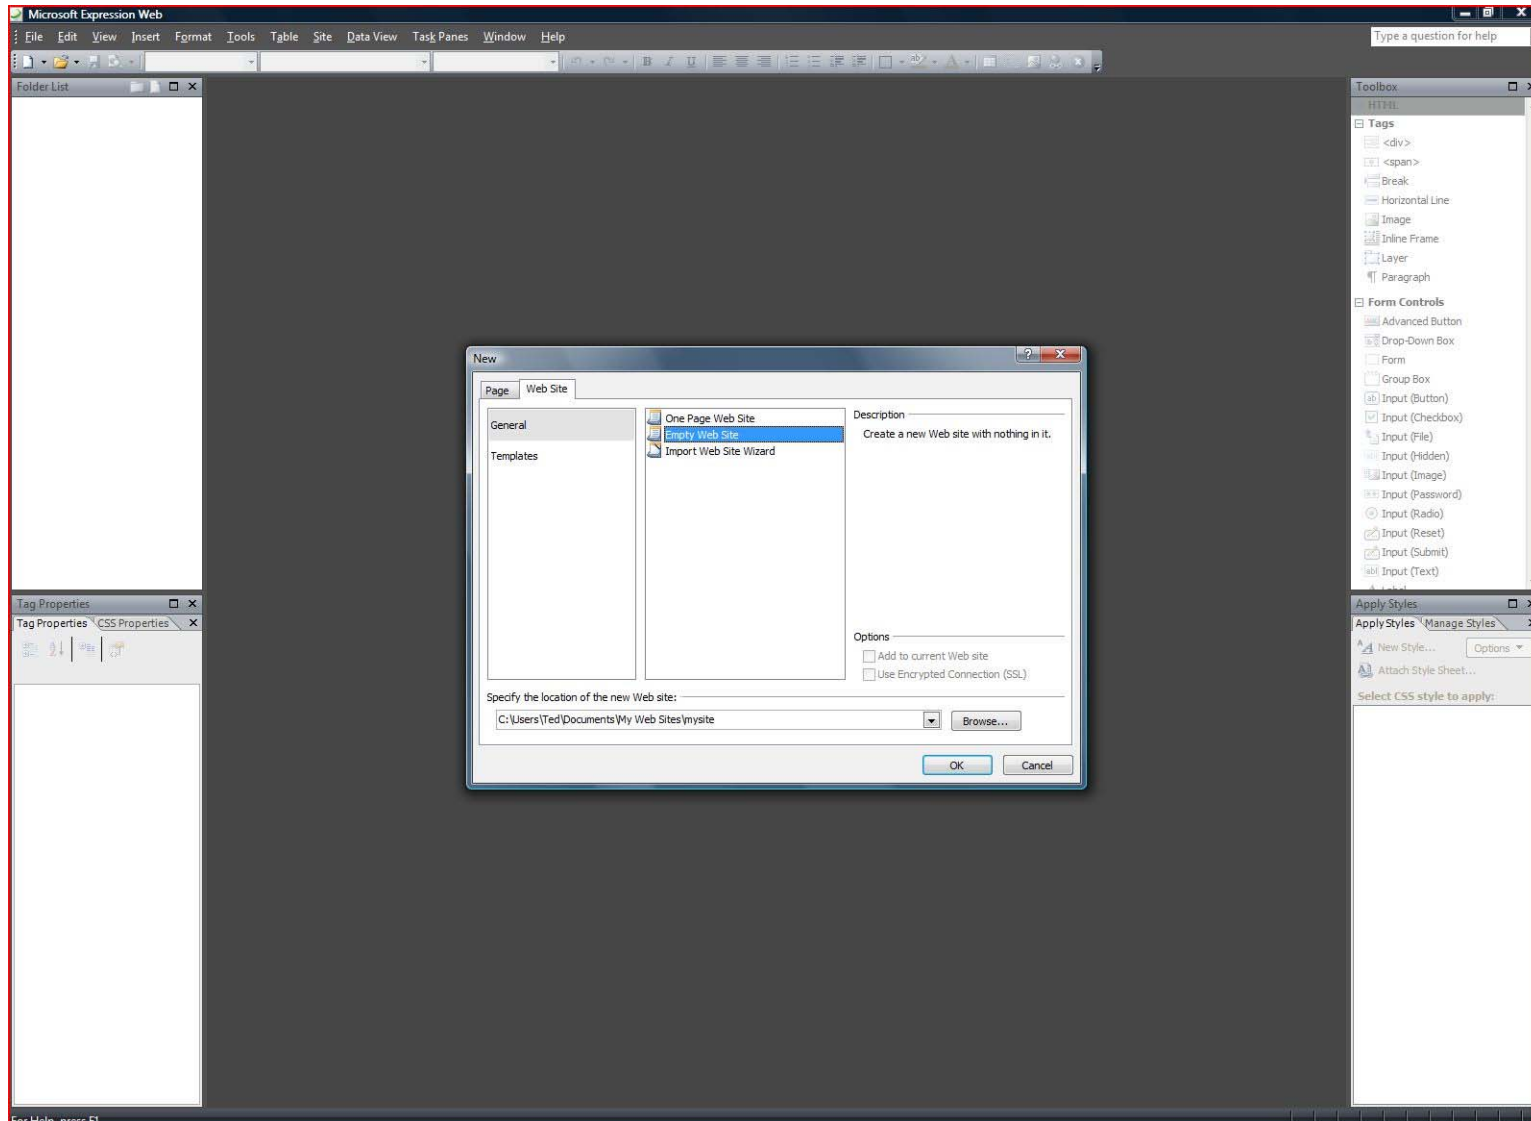

# IF IT'S NOT ON THE SERVER, YOU ARE THE ONLY ONE WHO CAN SEE IT

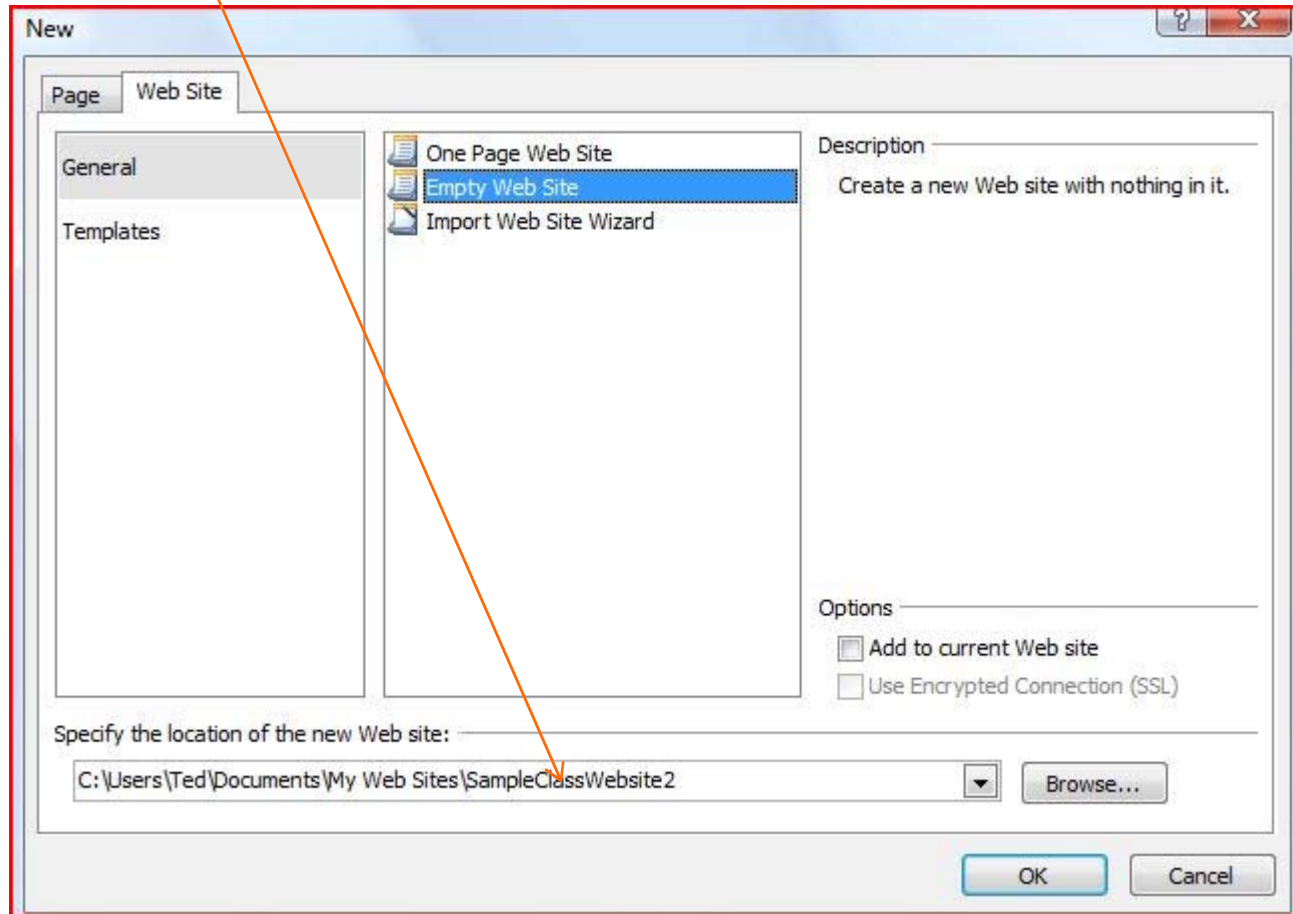

# FRONTPAGE TO EXPRESSION WEB TO EXPRESSION WEB 2 (A MUCH BETTER PROGRAM THAN FRONTPAGE)

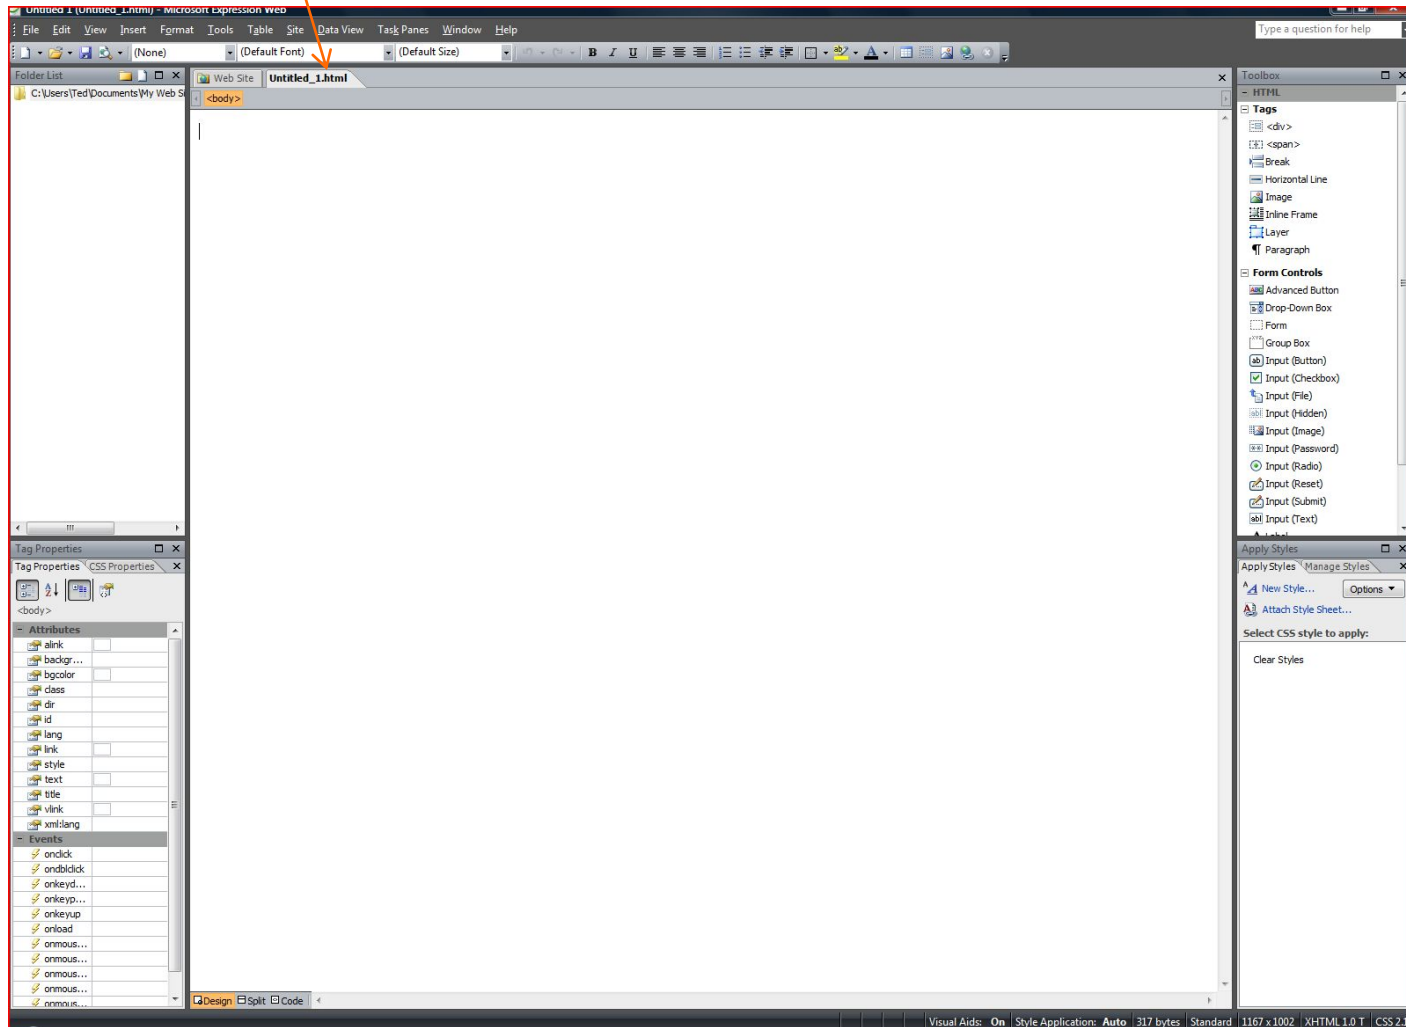

# FILE, THEN NEW, THEN “OPEN SITE”

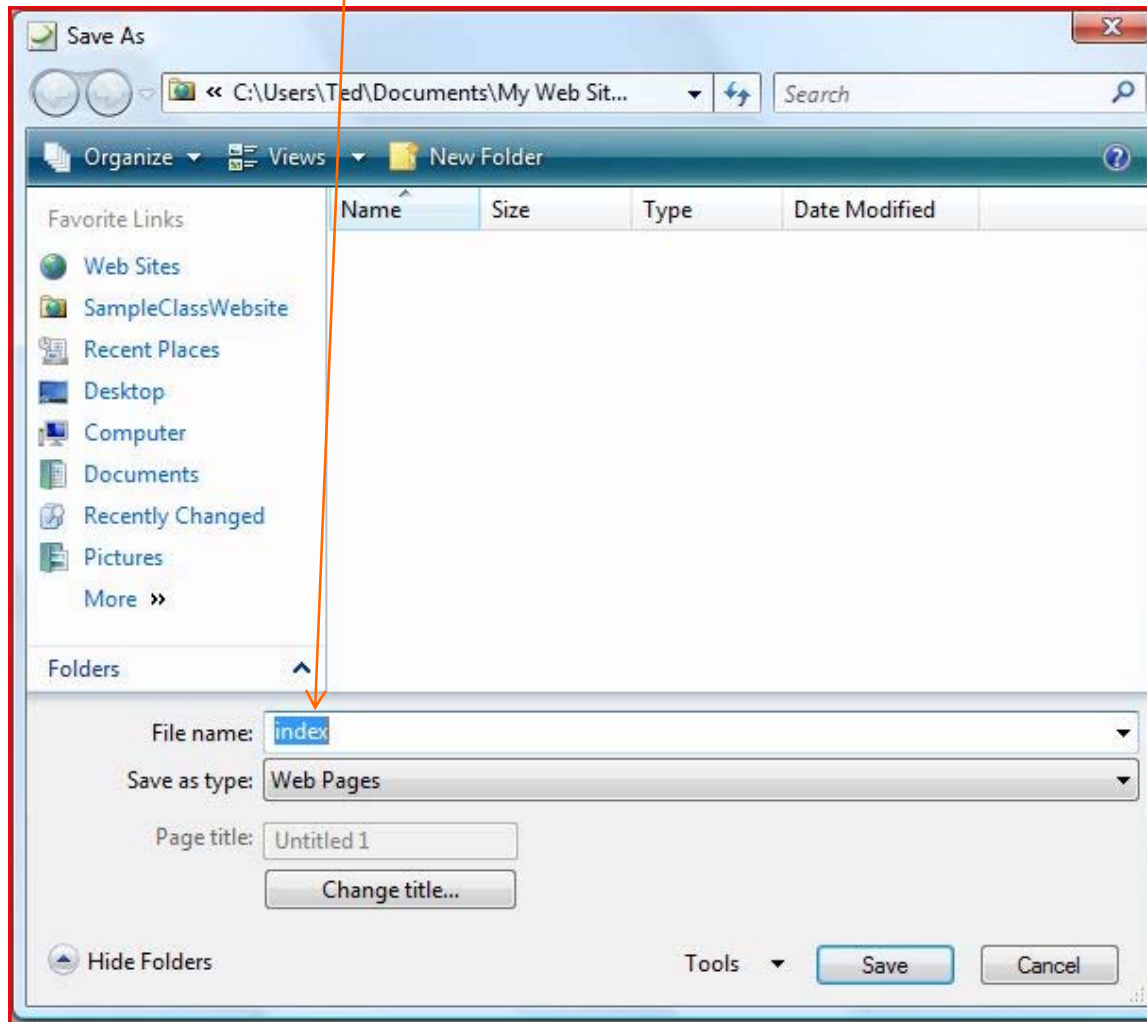

# CHOOSE A LOCATION AND NAME FOR YOUR NEW SITE ON YOUR COMPUTER (OR FLASH DRIVE)

# CREATE FIRST PAGE: FILE, “NEW” THEN “HTML”

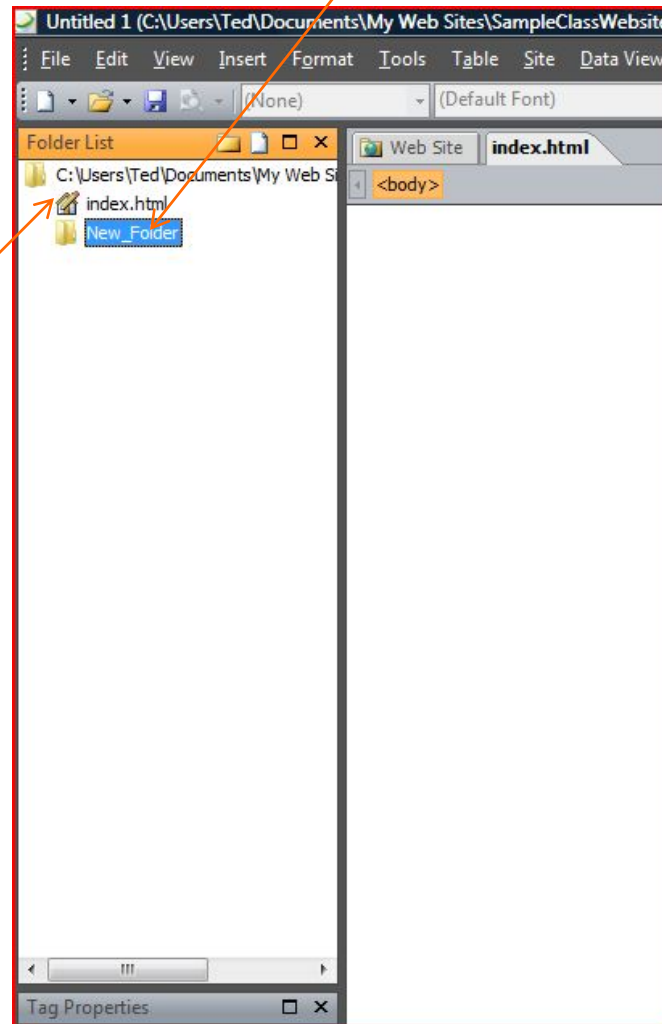

SAVE YOUR UNTITLED PAGE. FILE, “SAVE AS...”  
YOUR DEFAULT PAGE (MAIN PAGE) HAS TO BE  
CALLED “INDEX”

CLICK ONCE ON THE FOLDER LIST “C:\...” THEN “FILE” THEN “NEW FOLDER” – YOU CAN CLICK ON THE “NEW\_FOLDER” AND NAME IT WHATEVER YOU CHOOSE.

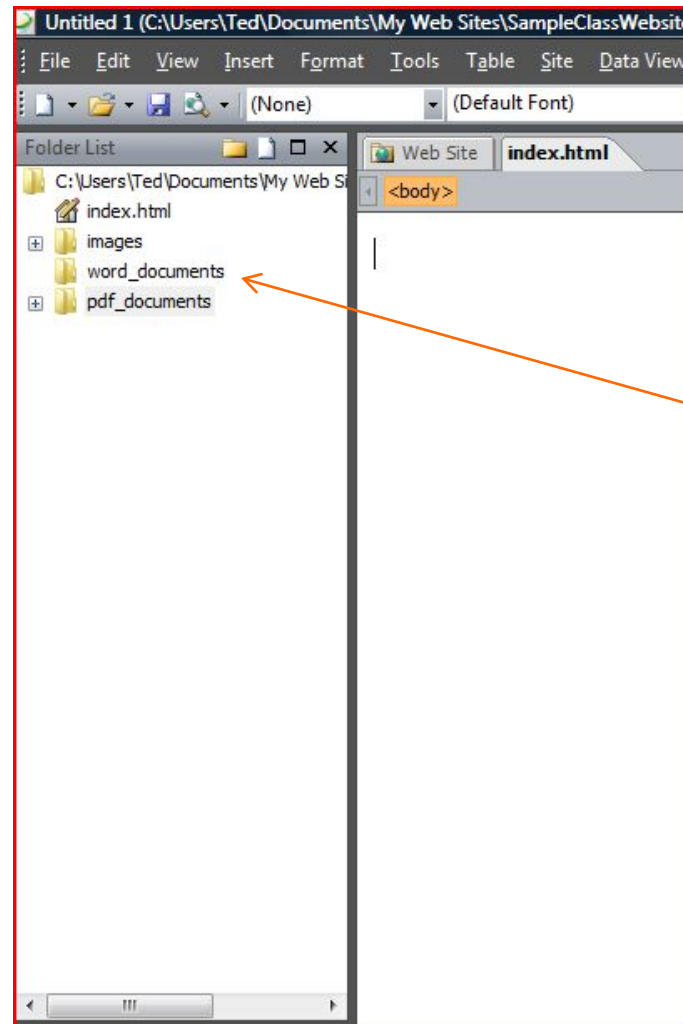

Any page you are working with will change its icon. Notice the index.html has a small pencil on it.

CREATE THE FOLLOWING NEW FOLDERS:

“IMAGES” “WORD\_DOCUMENTS”

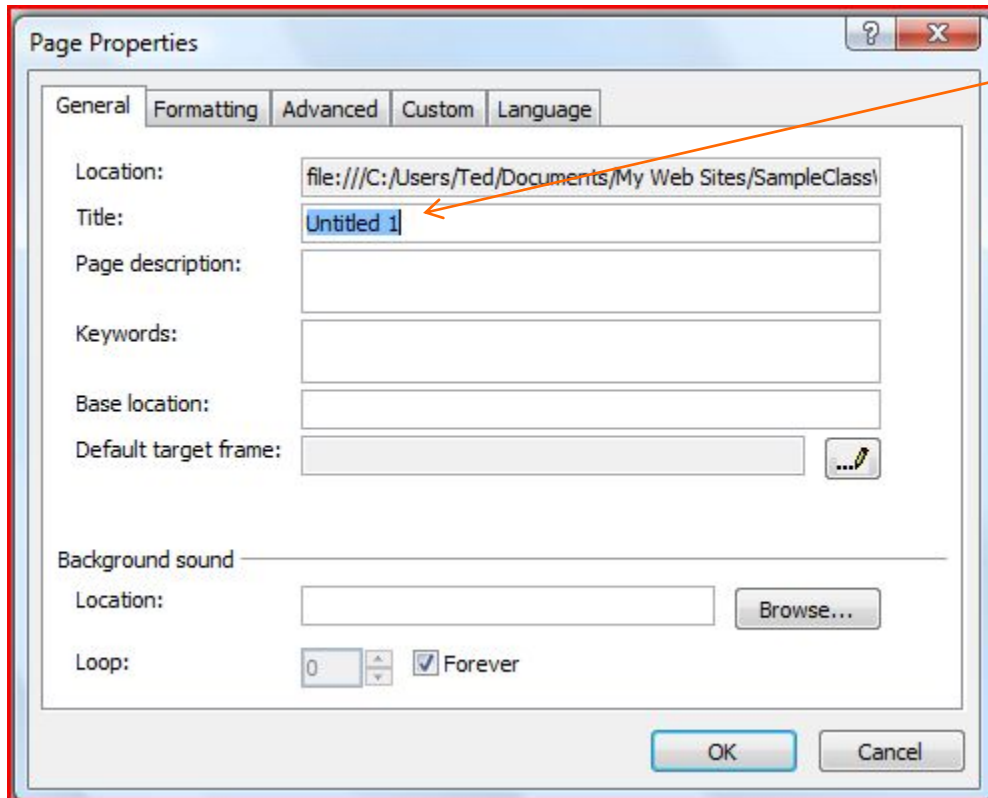

“PDF\_DOCUMENTS” – WE’LL USE THESE LATER.

The Internet and server usually don't recognize the difference between uppercase and lowercase. Also, they don't like spaces. So **my\_pictures.html** rather than "my pictures.html"

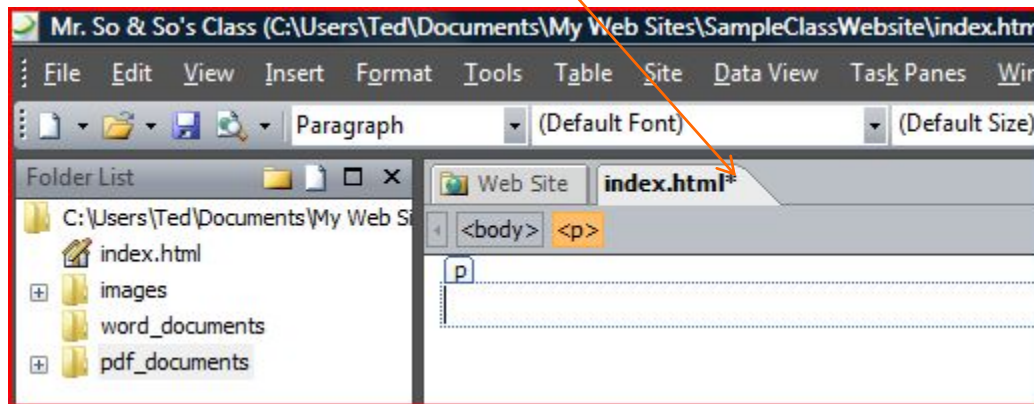

# CLICK “FILE” THEN “PROPERTIES”

Give your page a title, like “Mrs. Smith’s Math Class” - You can insert a music clip here and key words for Google searches, etc.

ALWAYS SAVE YOUR WORK FREQUENTLY. IF YOU PAGE IS NOT SAVED IT WILL APPEAR WITH AN ASTERISK.

AFTER YOU SAVE YOUR PAGE, CLICK “FILE” THEN “PREVIEW IN BROWSER” AND IT SHOWS LIKE BELOW WITH YOUR TITLE YOU ENTERED.
