

TESTING CSS BROWSER COMPATIBILITY

Different Internet browsers, like Internet Explorer, Safari, Firefox, or Google Chrome work differently and might show your webpage differently.

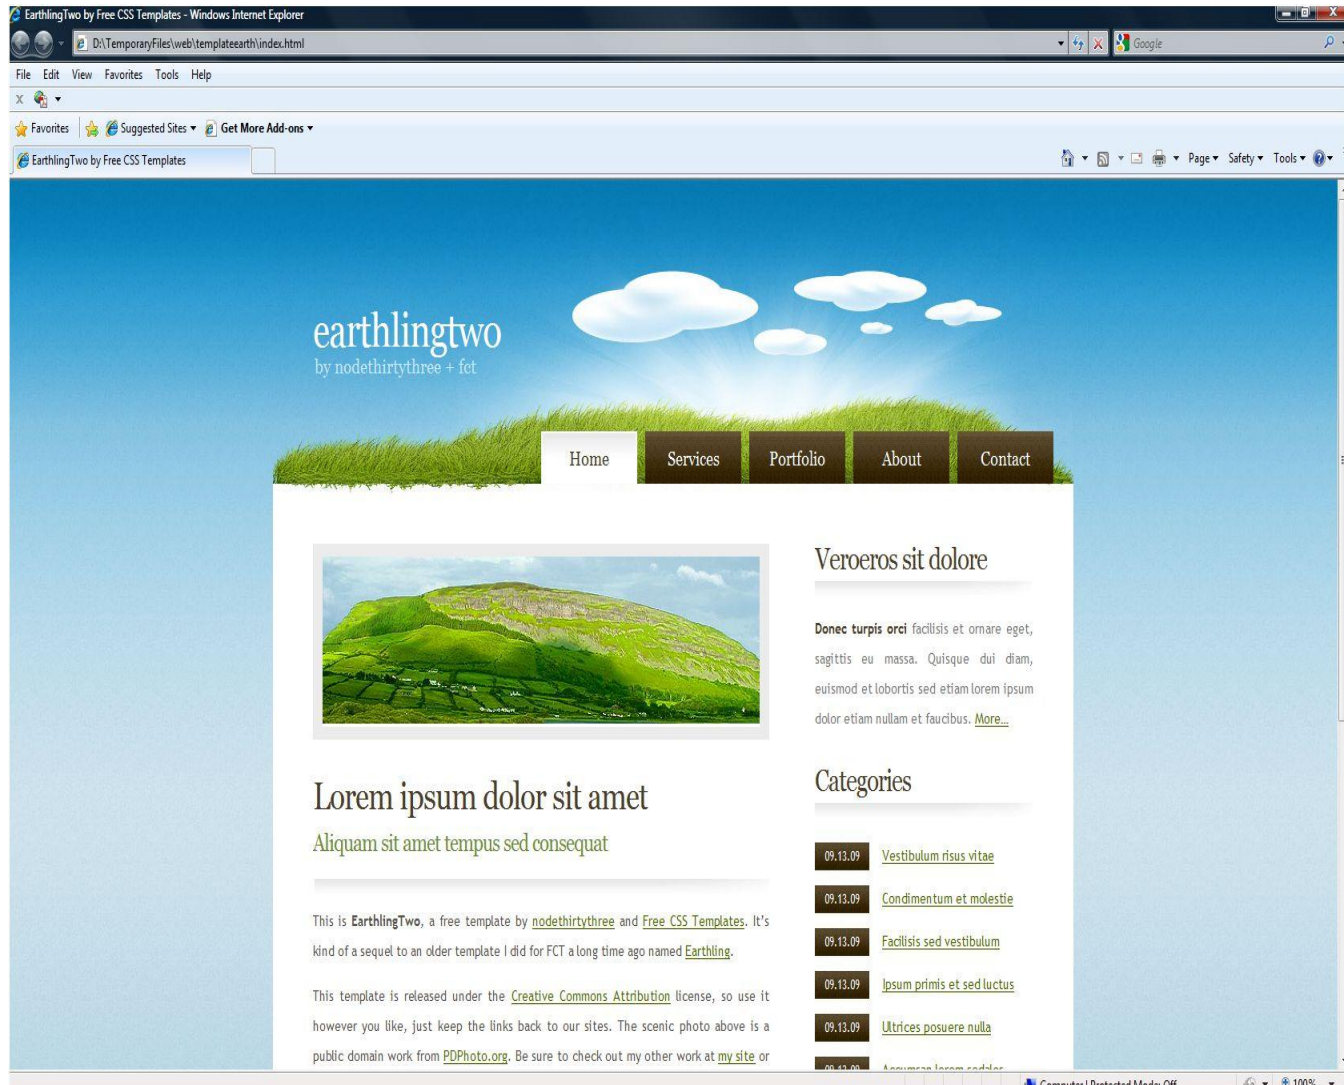

By Ted Mitchell

OPEN THE FOLDER THAT CONTAINS THE WEB TEMPLATE YOU DOWNLOADED FROM THE FREE TEMPLATES SITE. DOUBLE-CLICK THE “INDEX” FILE TO SEE THE WEBPAGE IN YOUR DEFAULT BROWSER.

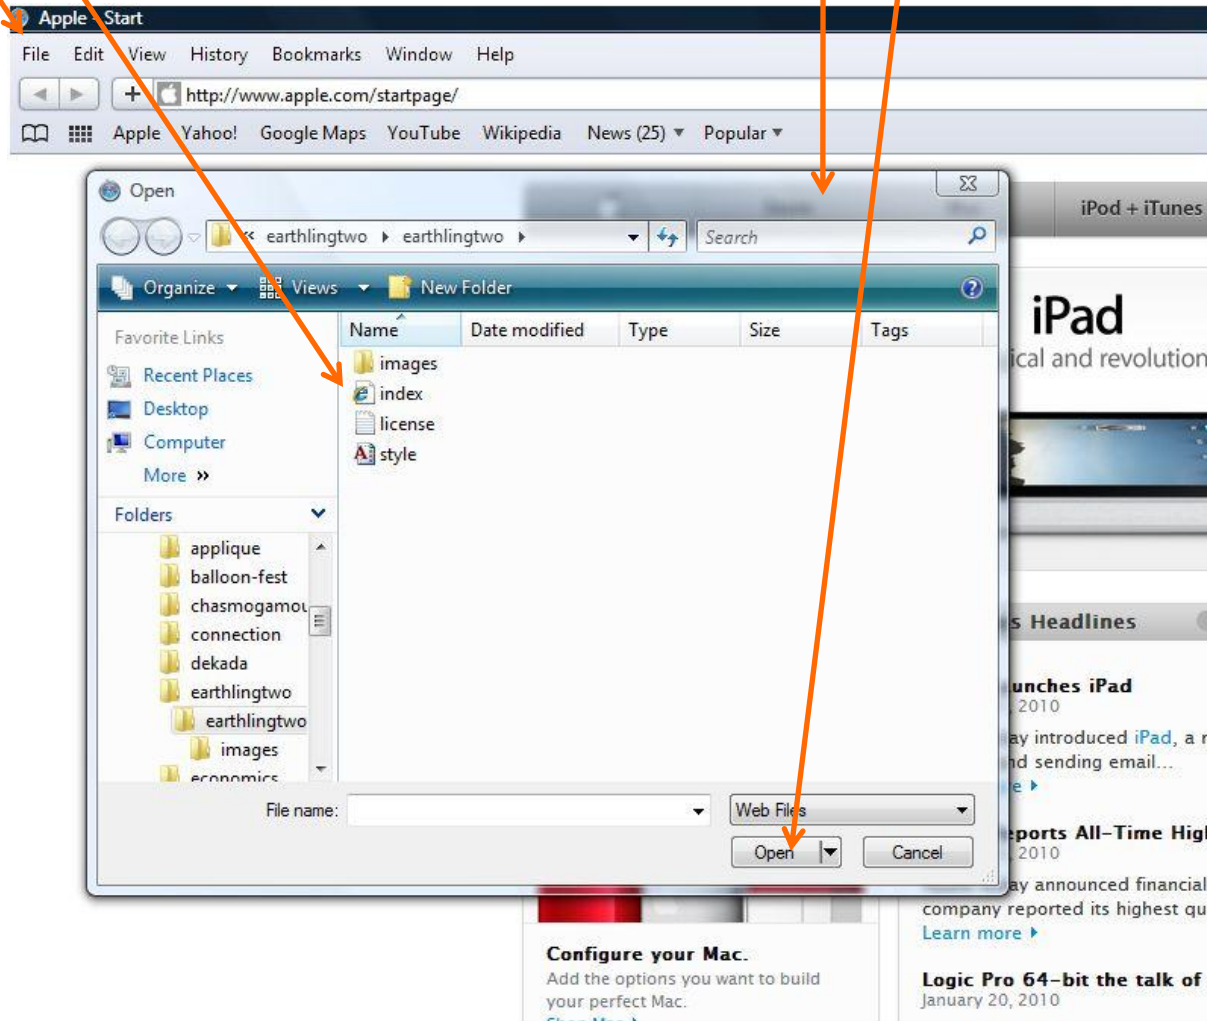

THIS IS WHAT THE MAIN PAGE WILL LOOK LIKE IN INTERNET EXPLORER 8 (MY DEFAULT WEB BROWSER). NO ISSUES HERE.

Many of our school computers still have **Internet Explorer 6**, which was released in 2001. It was rated in PC World's "The 25 Worst Tech Products of All Time." Ask for an upgrade from your tech. staff. Some templates look strange in it too, but all other people at home have been done with it for a long time.

OPEN SAFARI BROWSER FOR PEOPLE WHO OWN MACS AND
CLICK “FILE” THEN “OPEN FILE” THEN THIS WINDOW APPEARS.
CLICK THE PAGE YOU WANT TO CHECK, THEN “OPEN.”

You need to
download Safari to
your computer. It’s
free and safe. Just
make sure you check
to NOT make it your
“Default browser.”
(unless this is what
you want.) Google it.

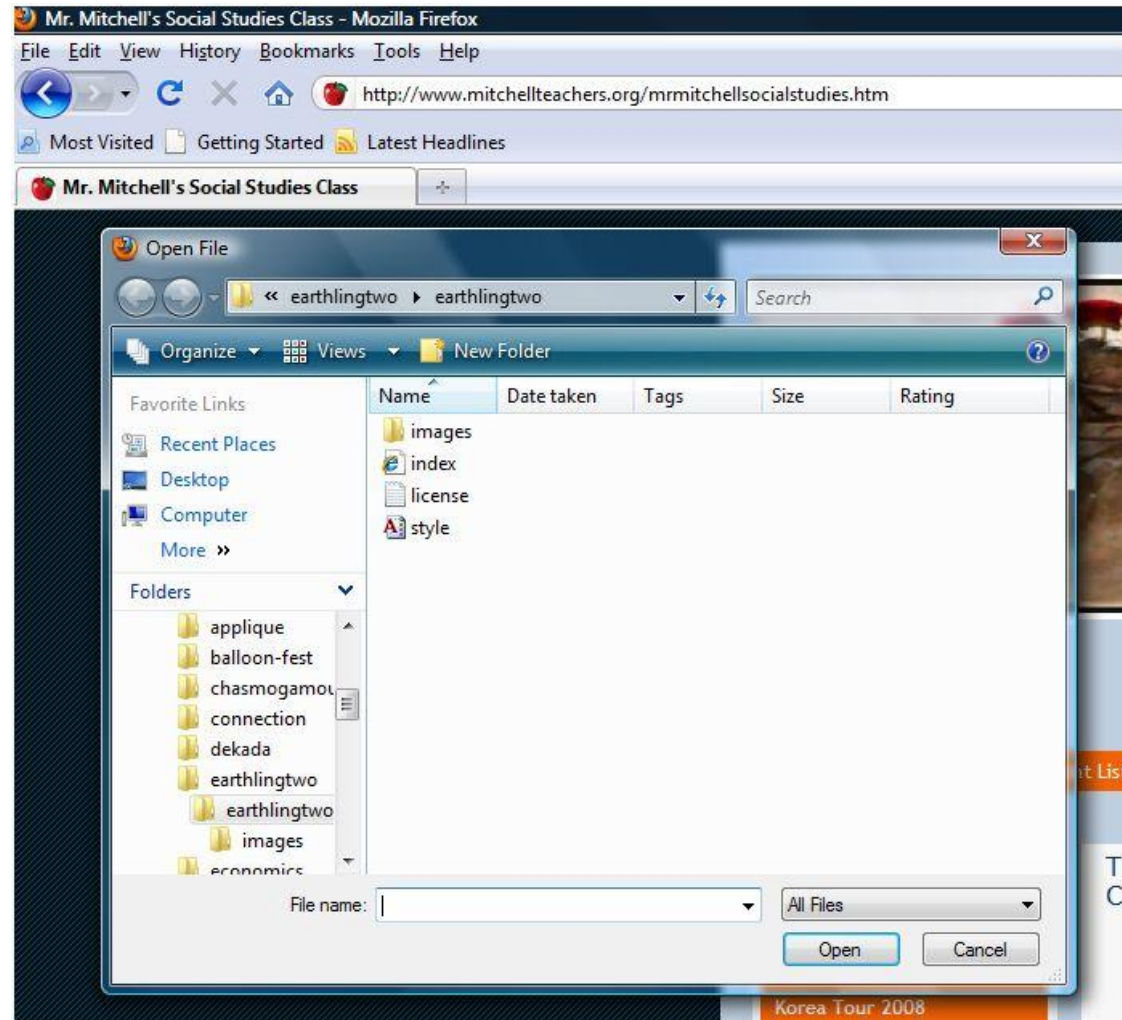

PAGE OPENED IN SAFARI. NO ISSUES EITHER.

OPEN FIREFOX, THEN CLICK “FILE” THEN
“OPEN FILE” THEN SELECT YOUR PAGE AND
CLICK “OPEN.”

Download Firefox for free. It's safe. Unless you want it to be your default browser, you need to uncheck this in the download process. Google it.

OPEN IN FIREFOX BROWSER. NO ISSUES HERE EITHER.

Lorem ipsum dolor sit amet

Aliquam sit amet tempus sed consequat

This is **EarthlingTwo**, a free template by [nodethirtythree](#) and [Free CSS Templates](#). It's kind of a sequel to an older template I did for FCT a long time ago named [Earthling](#).

This template is released under the [Creative Commons Attribution](#) license, so use it however you like, just keep the links back to our sites. The scenic photo above is a public domain work from [PDPhoto.org](#). Be sure to check out my other work at [my site](#) or follow me on [Twitter](#) for news and updates. Have fun.

Veroeros sit dolore

AN EXAMPLE OF WHY THIS IS NECESSARY: HERE IS OUR MIDDLE SCHOOL'S SITE IN FIREFOX! WHOOPS. I, OBVIOUSLY DIDN'T CHECK THIS AND NEED TO RECONFIGURE THE SITE. LEARN FROM MY MISTAKES.

GOOGLE CHROME BROWSER: I NEVER USE THIS AND COULDN'T FIND A MENU BAR, SO I TYPED THE DRIVE I HAVE MY TEMPLATE ON INTO THE URL ADDRESS BAR – “D:” THEN “D:INDEX OF FILES” OPTION CAME UP AND I CLICKED THAT.

Download “Google Chrome” by Googling it. Do the same as above if you don't want this to be your default browser. It's safe too.

THIS IS WHAT WAS DISPLAYED SO I CLICKED
“TEMPORARY FILES” WHERE I STORED THE
TEMPLATE.

NOW THAT THE BROWSER COMPATIBILITY OF THIS TEMPLATE IS ALL SET, IT IS READY TO BE EDITED AND USED ONLINE.

THE END

There are other browsers out there, but I've shown you the main or most popular ones. Good luck editing. See more tutorials for this.
